# AFRICAN NETWORK OF CENTRES OF EXCELLENCE IN ELECTRICITY (ANCEE)

# FIRST QUARTER 2024 ACTIVITY REPORT

## ACTIVITY PERIOD: 1st quarter 2024 Coordination Unit of ANCEE-NETWORK

GROUPE DE LA BANQUE AFRICAINE DE DÉVELOPPEMENT AFRICAN DEVELOPMENT BANK GROUP

## LIST OF ACRONYMS

- ✤ AFD: French Development Agency
- \* ANCEE: African Network of Centers of Excellence in Electricity
- ✤ APUA: Association of Power Utilities of Africa
- ATC: Aswan Training Center (Egypte)
- ✤ AfDB: African Development Bank
- ✤ CoE: Centre of Excellence
- ✤ CdF: Training Centre
- ✤ CIE: Ivorian Power Utiliy
- ✤ CME: Centre des Métiers de l'Électricité (Ivory Coast)
- ✤ CSTE: Center of Science and Technology of Electricity (ONEE-Morocco)
- EAL: ESKOM Academy of Learning (ESKOM-South Africa)
- ✤ ESIE: Inter-African Higher School of Electricity
- EEHC: Egypte Electricity Holding Company (Egypte)
- GTC: Geothermal Training Centre (Kengen-Kenya)
- ✤ IFEG: Electricity and Gas Training Institute (Algeria)
- \* KGRTC: Kafue Gorge Regional Training Centre (ZESCO-Zambie)
- MTC: MOKATTAM Training Center (EEHC- Egypt)
- \* NAPTIN: National Power Training Institute of Nigeria (Nigéria)
- ✤ SdE: Power utility
- SONELGAZ: National Electricity and Gas Company (Algeria)
- TDR:Reference Term
- ✤ UdC: ANCEE Coordination Unit
- \* UPDEA: Union of Producers, Transporters and Distributors of African Electric Power
- ✤ ONEE: National Office of Electricity and Water

#### STEG:Tunisian Electricity and Gas Company

- VRA : Volta River Academy
- \* ATP: Annual Work Plan
- **RFP:** Direct Payment
- ✤ EOI: Expression of Interest
- ESMP: Environmental and Social Management Plan
- PER: Resettlement Action Plan
- EN: Working capital
- CLAR: Results-based Logical Framework
- ✤ UA: Unit of Account

| C.1   | Progress on compliance with clauses  | 14    |
| C.1.1 | Status of the main activities to be undertaken during the previous quarter (according to the AWPB) | 14    |
| C.1.2 | Key activities planned for next quarter (according to AWPB)  | 15    |
| C.2   | Performance of procurement   | 17    |
| C.2.1 | Implementation of the Procurement Plan   | 17    |
| C.2.2 | Management of current contracts  | 23    |
| C.3   | Financial monitoring of the Project  | 30    |
| C.3.1 | Financial progress   | 33    |
|       | Conclusion and Recommendation  | 34    |

#### A – SUMMARY

This report traces the activities carried out by the African Network of Centres of Excellence in Electricity (ANCEE) for the first quarter of 2024.

It reports on the following activities:

- Training for the Power sector
- Procurement
- Feasibility studies
- ANCEE physical and financial monitoring report

The first quarter of 2024 is marked by the continuation of the activities of the network following the extension of the closing date of the ADF grant No. 2100155029817 to 30 June 2024 and of the AFD Grant: CZZ 1982 01 H on the same date.

During the first quarter of 2024, taking advantage of the opportunity to extend the project to 30 June 24, the RACEE Coordination Unit intensified its efforts to allow the closure of equipment contracts, the completion of contracts for ongoing studies as it has continued its regular exchanges with the Pu and CoE on the collection and treatment of training needs and the validation of training offers.

We can note during this first quarter 2024, the realization of ten (8) in-situ training sessions and two (2) elearning training sessions for the benefit of the staff of the company ESCOM (Malawi). These ten (10) training sessions trained one hundred and fifty-one (151) people. proposals for the provision of training on thirteen (13) topics for the benefit of three (3) companies and sixty-four (64) persons to be trained, already confirmed and in progress from the second quarter of 2024, the continuation of the processing of applications for training received from electricity companies, each time focusing on the priority needs of companies and respecting the award criteria within the limits of the subsidies still available.

The process of acquiring teaching equipment for the CoEs has been completed, with all the equipment delivered and installed. All suppliers have been fully paid with the exception of Delorenzo (Equipement EEHC). The outstanding balance (10%) will be paid on receipt of the final acceptance report.

With regard to the feasibility studies included in the budget, the feasibility, environmental, social and architectural impact study for the construction of the "Electricity Campus" in Mali is currently being finalized.

The above-mentioned first-quarter activities, including the operation of ANCEE, resulted in a financial outflow of € 264,311.

## A.2 – Problems, risks and measures to be examined by donors

Several difficulties, summarized in the table below, hamper the smooth running of the network's activities.

| Main problems / Risks   | Corrective measures/<br>Mitigation measures   | Comments                                   |
|---|---|--|
| In the first quarter, the Pu's<br>budget for staff training has<br>not yet been validated in<br>the majority of Pu's in the<br>first quarter of 2024. | Direct exchanges with Pu's<br>to anticipate and plan<br>minimum training<br>requirements for Pu's                       | <b>-</b>                                   |
| Some CoEs persistently slow<br>to respond to requests from<br>CU  | More frequent telephone<br>exchanges, and the<br>forthcoming introduction of<br>a single training framework<br>contract | the field and better contribution on their |
| Binding internal procedures<br>within the Pu's for<br>validating documents<br>(contracts, documents)  |   | Better understanding and response times    |
| Saturation of training subsidy lines  | need to move towards<br>arbitration in granting<br>subsidies  | Limitations on training programming        |

► The coordination unit continued its efforts to process the training needs received from the Pu's by soliciting the CoEs to make proposals offers. Power utilities' interest in ANCEE training was demonstrated by the signing during the quarter of six in-situ training contracts with ESCOM of Malawi, covering four (04) training modules and seventy-five (75) people to be trained, with a training volume of 375 md for the first contract, four (04) training modules including 2 in-situ and 2 e-learning with the company ESCOM (Malawi) for forty-six (46) people to be trained and a training volume of 230 md for the second contract, two (02) in-situ training modules and thirty (30) people to be trained and a volume of 225 md for the third contract.

► Following on from the training programs currently underway, thirteen in-situ and face-to-face training modules for 3 utilities, Egenco (Malawi), Zesco (Zambia), Ciprel (Côte d'Ivoire), which have been validated by the utilities, are in the process of being signed and should see the start of implementation in the second quarter of 2024.

► In addition to the establishment of a face-to-face training contract between Kengen and Egenco to replace the one already instructed with EEHC at Egenco's request.

Training requests received by Cu have been processed while respecting the grant criteria, These include requests received from SNE (Chad), SBEE (Benin), EGENCO (Malawi), ADPI (DRC). Some of these training offers are awaiting validation by the utilities.

## B.1 – Impact indicators according to AFD logical framework

| N° | Designation   | Target value                    | Total  | Achieved by<br>March 31,<br>2024 | %        |
|----|---|---------------------------------|--------|----------------------------------|----------|
| 1  | Total number of people who have benefited from                |                                 |        |                                  |          |
|    | vocational training through the network (all types of         |                                 |        |                                  |          |
|    | training)   | 9 350                           | 8 940  | 8 940                            | 96 %     |
| 2  | Total number of people benefiting from the network's          |                                 |        |                                  |          |
|    | face-to-face vocational training courses                      | 7 750                           | 3 703  | 3 703                            |          |
| 3  | Total number of people who have benefited from                |                                 |        |                                  | <b>-</b> |

#### B.3 – Quantitative aspects of training courses

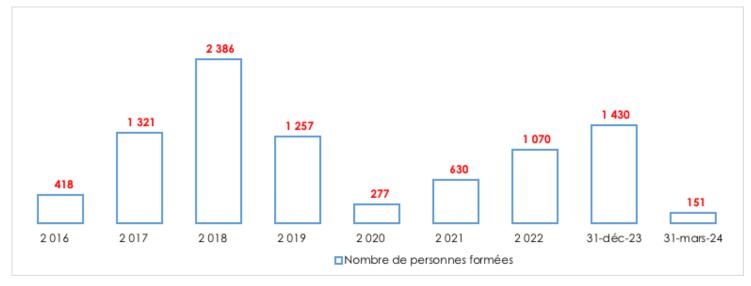

▶ Figure 1 : People trained from January 1 to March 31, 2024

#### <u>Comment :</u>

In three months, the network trained 151 people in 10 training themes. In-situ training accounted for 88% during this period, ahead of e-learning with 12%. There is therefore greater interest in in-situ training, due to the ease with which it can be set up and the possibility of benefiting a larger number of staff without the need for costly travel for the Power utility.

 Figure 2. Updated table of the total number of people trained since the start in the network to March 31, 2024

#### <u>Comment :</u>

This table shows the number of people trained since the launch of the project in the various training modes up to March 31, 2024. A total of **8,940** people have been trained since the project was launched. The following achievements can be noted:

- 53% face-to-face training
- 41% on-site training
- 7% e-learning

▶ Figure 3 : Evolution of man-days updated since the start of the project to March 31, 2024

### Comment :

Cumulative m/d to March 31, 2024 is 55,844, which corresponds to the project's initial objective, after deduction of long-term training (specialized vocational training) originally planned to represent a volume of 38,000 h/d.

### C – Progress report

A reading of the physical indicators relating to activities in the 1st quarter of 2024, which translates into the continuation and significant progression of in-situ training. This trend will continue throughout 2024, with the implementation of scheduled training courses.

It should be noted that the majority of training courses carried out in the 1st quarter were in-house. However, e-learning training is beginning to take off.

#### C.1 – Progress on project activities

### C.1.1 – Status of main activities to be undertaken in the previous quarter (according to PTBA)

| Component                    | Activities  | Deadline  | Statut                                     | Comments   |

## C.1.2 – Key activities planned for the next quarter (according to the AWPB )

| Component                  | Component Activities  |           |  |
|----------------------------|---|-----------|--|
| 1. Setting up the network  |   |           |  |
|                            | 19,966 euros to supplier ELEXPERT will be paid upon receipt of the final acceptance report from EEHC.                                 | June 2024 |  |
| 2. Network operation       |   |           |  |
|                            | Updating the offer/request applica  | June 2024 |  |
| 3. Training for the sector |   |           |  |
|                            | Technical and administrative staff of Power utilities trained   | June 2024 |  |
| 4. Promotion of new CoEs   |   |           |  |
|                            | Feasibility, environmental and social impact and<br>architectural studies for the construction of the<br>"Electricity Campus" in Mali | June 2024 |  |
| 5. Key success factors     |   |           |  |
|                            | Conformity assessment of Centers of Excellence  | June 2024 |  |

### C.2.1 – Implementation of the Procurement Plan

Include comments on the progress of acquisition implementation during the previous quarter, highlighting its key achievements, challenges, as well as the performance of the Borrower and the Bank.

The extension of the deadline for using the ADB and AFD grants to June 30, 2024, has enabled ongoing activities to be completed and continued. Thus, the status of activities carried out during the first quarter of 2024 is as follows:

#### <u>I : GOODS</u>

Follow-up on the process of acquiring teaching equipment for the RACEE centers of excellence with ADB funding, on the understanding that the process of acquiring equipment with AFD funding has been completed.

| Contract status at March 31, 2024 - AfDB financing  |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|
| Market title     Contract<br>holder     Progress report     Estimated completion date   |  |  |  |  |  |  |  |

Comments

1.All the teaching equipment purchased as part of the RACEE project with funding from the AfDB and AFD has been fully delivered, installed and is in use.

As of March 30, the project still owes 10% of the contract amount, i.e. 19,966 euros to supplier ELEXPERT. Payment will be made on receipt of the final acceptance report from EEHC.

2.All centers of excellence, with the exception of the Kengen GTC, have received their nameplates. The nameplates have been installed in accordance with the provisions of the deed of commitment signed between APUA and the centers of excellence when the didactic equipment was purchased.

II- SERVICES

During the first quarter of 2024, the project carried out the following activities relating to the management and monitoring of service contracts.

|   |                            | Contracts at March 31, 2024 - AFDB financing   |   |

#### **CONCLUSION AND RECOMMENDATIONS**

Achievements (disbursements) on the AfDB line as at March 31, 2024, amounted to 9,162,367 euros, representing a cumulative rate of 94.05% compared with December 31, 2023, when the disbursement rate was 91.49%. The amount disbursed during the 1st quarter of 2024, in the order of 249,170 euros, represents a 2.8% lower rate of change than that recorded during the 4th quarter of 2023, due in part to the delay in funding the Bank's special account, which occurred in March 2024.

This lower quarterly growth rate is also explained by the fact that the last quarter of last year saw the payment of major equipment bills. However, the quarter was still characterized by the payment of training invoices (34.4%), service invoices for studies (EDM Mali and CoE compliance) (30.3%), equipment invoices (25%) and operating expenses (10%).

In addition, the level of disbursements reached at March 31, 2024, of 94.05%, corresponds perfectly to our forecasts, enabling us to achieve a disbursement rate of around 98-99% by the end of the project (June 2024). This rate reflects the follow-up effort that enabled all project activities to be carried out, and their completion thanks to the additional 6-month extension period granted by the Bank.

In addition, the additional six (06) month extension granted by AFD has also enabled the finalization of all contracts subject to payment. These two extensions to June 30, 24 will make it possible to get even closer to the announced disbursement rate of 99%, given the expenditure still to be settled between now and June 30, 2024.

It is also worth pointing out that the momentum in receiving and processing training applications has not slackened, given that some twenty new commitments have already been identified to date, to be implemented during 2024 and requiring the mobilization of an envelope of over 300,000 euros in ANCEE subsidies.

During the transitional phase to ANCEE 2.0, the Pu's will be asked to make an additional effort to contribute more significantly to training funding, given the saturation of the training line on the two AfDB and AFD grants.
